JASON LUAN

**JOBS,
ECONOMY &
PROSPERITY!**

● ENERGY INDUSTRY & ECONOMIC DIVERSIFICATION

- Economic diversification is important for us to mitigate the volatility of the oil & gas market; however, we shall never forget who we are and what our uniqueness is.
- Energy will always be an important part of our lives and our economy. We shall embrace it, celebrate it and make the best out of it.

● HEALTH CARE

- I believe in high quality, publicly-funded health care.
- I also support complementary alternative practices, such as Acupuncture and Traditional Chinese Medicine to enhance our core public health care system.
- I support a system of care that provides choice and that is flexible in meeting the needs of all Albertans.

WHERE I STAND

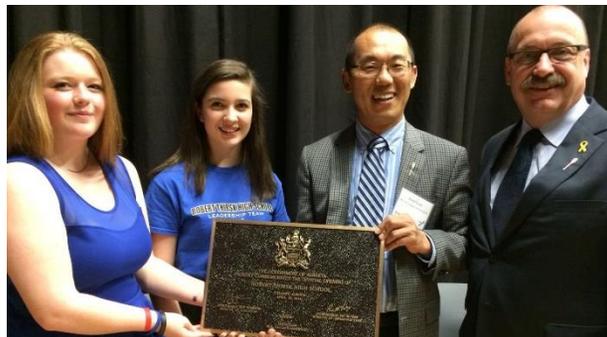

● FISCAL RESPONSIBILITY

- I am a fiscal conservative and am proud of having lived my life this way.
- I came to Canada empty-handed as a 25-year-old immigrant and succeeded as an established professional and an investor. I attribute my financial success to the fiscal conservative values that my family passed on to me.
- I believe that Government needs to manage its budget following the same principles as we do in our families, because it is tax payers' money!

● MARKET ECONOMY

- I support free enterprise, limited government involvement, low levels of taxation, and a regulatory regime that is fair, competitive and robust.

● EDUCATION

- In particular, I support "education by choice", to give parents and children the freedom to choose what's best for them and their aspirations.
- My two daughters benefited from such choices and I would like to see more people enjoy the same.

● CARBON TAX

- I oppose carbon tax, particularly, the timing of such tax being introduced, when the world oil price collapsed.
- Such a tax adversely impacted the oil and gas industry at a time when support was needed to get the industry out of the economic recession. It prolonged the recovery of Alberta's economy (adding salt to a wound) and needs to be stopped right away.
